Collaborative Software Built for Construction

Improve quality control, safety, and project management on the jobsite.
BIM 360 Build is an integrated field and project management tool that allows users to get instant project updates both in the office and in the field.

Benefits

**Improve Quality and Safety**
Use customizable templates and checklists to track quality and streamline safety inspections.

**On Time. On Budget.**
Monitor and improve field performance by using historical jobsite data to drive decisions and minimize risk.

**RFI and Submittal Tracking**
Easily log and track RFI\'s and Submittals through a single platform to gain clear visibility into project status.

Capabilities

Combine mobile cloud based collaboration technologies for onsite use of tracking and logging RFI\'s and Submittals as well as gaining insights into reporting to manage field processes such as quality, safety and commissioning.

**Quality Control**
Create and assign issues and track work with checklists.

**Daily Reporting**
Log daily site activity to keep track of project progress and performance.

**Jobsite Safety Management**
Encourage safety program adoption with inspection checklists and reporting.

**RFI Tracking**
Create RFI\'s and track progress using customized workflows.

**Submittal Tracking**
Oversee submittal logs across the entire team and easily view statuses.

**Collaboration**
Assign tasks to team members and automate report distribution.
Expand BIM 360 Build with additional packages:

**Common Data Platform**

Rather than working in siloed systems, BIM 360 integrates the entire project workflow from design through construction across one common data platform. Teams can easily transfer information from one phase to the next while housing all project information and data within a single solution.

### Centralized Source of Truth
- Single database with the most up to date information
- Eliminate multiple iterations and rework
- Deeper understanding of project data to help make informed business decisions

### Easy Team Handoff
- Fast adoption from one team to the next
- Cloud based connectivity for mobile and desktop
- Accessible historical data

### Improved Decision-Making
- Access to the right information at the right time
- All changes reflected in current state of published files
- Involve more stakeholders earlier on in the construction process

---

**Autodesk BIM 360**

- **Design**
  - Design Collaboration
  - Increase team engagement with live updates on design files

- **Glue**
  - Model Collaboration
  - Streamline VDC & BIM workflows with model coordination and clash detection

- **Build**
  - Field Management
  - Improve construction quality control and jobsite safety
  - Project Management
  - Progress tracking with RFIs and Submittals

**BIM 360 Docs**

**Project Analytics**

---

**BIM 360 Add-Ons**

- **BIM 360 Plan**
  - Utilize lean construction methods to build more reliable work plans.

- **BIM 360 Ops**
  - Helps building owners realize the operating potential of their buildings.
