Construction Document Management Built for Project Teams

When construction project teams have the right information at the right time, work happens faster.

BIM 360 Docs lets you publish, manage, review and approve all construction drawings, documents and models -- anytime, anywhere.

**Benefits**

**More Time. Less Rework**
Live updates and version control allows project teams to spend less time fighting with files and more time building.

**Increased Collaboration**
View, share, and review files with team members and project stakeholders to help everyone stay connected.

**Single Source of Truth**
Documents, plans and models in one place -- with accessibility anytime or anywhere -- to always stay current and connected.

**Capabilities**

BIM 360 is a connected cloud platform for construction professionals, both in the office and on the jobsite, leading to faster project delivery and more predictable outcomes.

**Document Control**
Set permission levels to keep the right information in the right hands.

**2D & 3D Workflow Support**
View, markup, edit, and publish both 2D and 3D drawings and models.

**Drawing Markups**
Create and share 2D and 3D markups for collaborative constructability reviews.

**Mobile Access**
Mobile accessibility on iOS and Android as well as offline sync functionality.

**Version Control**
Quickly review changes from one revision to the next.

**Publish Drawings**
Extract document sets from design files and automate with OCR title block data.
Expand BIM 360 Docs with additional packages:

**AUTODESK® BIM 360™**

### Design
- Revit Cloud Worksharing: Securely co-author a Revit model within one firm or across multiple firms.
- Design Collaboration: Coordinate deliverables, visualize design changes, and track project progress.

### Glue
- Model Collaboration: Streamline VDC & BIM workflows with model coordination and clash detection.

### Build
- Field Management: Improve construction quality control and jobsite safety.
- Project Management: Progress tracking with RFI’s and Submittals.

---

“BIM 360 Docs document management solution is intuitive and easy to engage with. We have the ability to prove who had what when, and what they were able to do with it.”

MIKE BECKETT, Hill Bespoke Ltd

---

**Common Data Platform**

Rather than working in siloed systems, BIM 360 integrates the entire project workflow from design through construction across one common data platform. Teams can easily transfer information from one phase to the next while housing all project information and data within a single solution.

**Centralized Source of Truth**
- Unified database with the most up to date information
- Eliminate multiple iterations and rework
- Deeper understanding of project data to help make informed business decisions

**Easy Team Handoff**
- Fast adoption from one team to the next
- Cloud based connectivity for mobile and desktop
- Accessible historical data

**Improved Decision-Making**
- Access to the right information at the right time
- All changes reflected in current state of published files
- Involve more stakeholders earlier on in the construction process
