

EFI Colorproof eXpress v3.5 vs EFI Designer Edition v5.1.5

Features EFI Designer Edition v5.1.5 does not have

Setup wizard for easy configuration of color and printing settings
Mac OS X 10.5 and Windows Vista support
Automatic nesting
DCS1, JPEG2000 and PSD support
"Daily work" mode
One-click spot-color handling
Simultaneous job processing on multi-processor computers for non-PDF and PS formats
Speed setting (determines RIP resolution)
Ugra/Fogra media wedge v3.0 support
Device link profile support
Compatible linearization to XF products (*.epI)
Restore in XF products
Laser, LED and wide-format inkjet printer support
Page frame setting can also be applied to simple jobs and not just to nestings
Print range and number of copies can be set up for the entire application
Displayed language can be changed in application
Definition of monitor profile and preview resolution
Compression modes for Tiff export (Packbits, ZIP)
Numerical scaling
Job rotation for minimal media consumption
Definition of horizontal/vertical margins for alignment
Definition of horizontal/vertical spacing between nesting jobs
Job ticket and control strip can be placed side by side or one above the other
Perceptual absolute rendering intent
Definition of warning color for unknown spot colors
For the IP protocol, RAW or LPR (with queue name) connection can be chosen
Preview functionalities: zoom, move, transform
