

Topbase™-Mobile

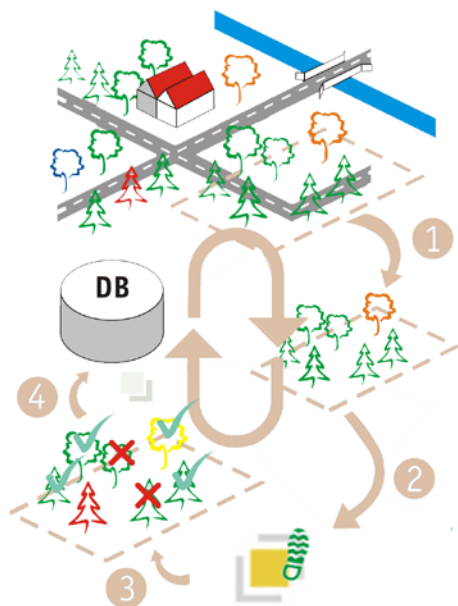

Topbase™-Mobile

Our mobile data acquisition solution – Topbase™-Mobile opens up manifold application possibilities via domain-specific modules. Topbase™-Mobile is a tool to work with complex data at their point of creation. With Topbase Mobile you can comfortably maintain your data base anywhere.

Topbase™-Mobile offers a consistent and comprehensive usage concept. The user interface is designed domain independent. Topbase Mobile is easily and intuitively used across various application modules. With its unique feature set, Topbase Mobile allows e.g. for a user-friendly mass data editing.

- 1 Select data from your GPS
- 2 Transfer data to your mobile device
- 3 Locally capture and validate data
- 4 Synchronize data with your GIS

Add-on modules

Using the add-on modules of our mobile, flexible data acquisition solution Topbase™-Mobile you are optimally prepared for all imaginable tasks.

Topbase™-Mobile GPS
Determines geographical coordinates of your managed items. Additionally, it is used with Topbase Mobile Map to locate items in the map.

Topbase™-Mobile Map:
Allows for the graphic display and selection of items in the map.

Topbase™-Mobile Photo:
Allows for the photographic documentation of items.

Topbase™-Mobile RFID:
Supports the unique identification of items using radio frequency identification (RFID).

Your benefits of using Topbase™-Mobile:

- >> Freely define your applications
- >> Avoid redundant data storage
- >> Efficiently edit mass data
- >> Enjoy a powerful and intuitive usage concept
- >> Maintain and use GIS and database information on your PDA, Smartphone, Tablet PC or laptop

Application domains

Local government/administration:
Topbase™-Mobile, in combination with GIS, supports you in your daily data administration, such as in maintenance and checkup management. For example, Topbase™-Mobile can be used in the management of streets, sewage systems or other infrastructures. Topbase™-Mobile enables an entirely integrated data flow from local data acquisition all the way through to your backend GIS.

Power utilities:
Topbase™-Mobile supports you in managing your assets in and around your transmission and distribution networks. Data about stations, switch gear, circuit breaker, transformers or other primary equipment can be acquired conveniently using Topbase Mobile.

Industries and other domains:
Let Topbase™-Mobile assist you in quality assurance, inventory management or fire protection. Various other fields of application can be covered with Topbase™-Mobile.

Suggested extensions:
Link your backend database and your GIS with a navigation assistant and learn the manifold possibilities of Topbase™-Mobile Navi in field work.
